Profile

CSE (Data Science) undergraduate with experience in AI/ML, Data Analytics, and Product Development. Currently working on AI-driven products at Spyne, translating business requirements into data-informed solutions through performance analysis and cross-functional execution. Interested in business growth, partnerships, and AI-driven initiatives.

Education

Manipal University Jaipur Aug. 2023 – Jul. 2027
B.Tech in Computer Science & Engineering, Specialization in Data Science — CGPA: 8.2

Experience

Product Management Intern | ***SPYNE, Gurugram*** Jun. 2026 – Present
- Led Hot Lead Re-Engagement for Vini-AI from product discovery to production, from the customer and business requirements to an AI solution.
- Built a live dashboard tracking engagement, conversion, and campaign metrics to analyze performance and identify improvement opportunities.
- Analyzed feedback from the dealerships and call-level feedback to translate business problems into product requirements with collaboration with Customer Success and Product teams.

Data Analytics Intern | ***MDTRESY Medical Travel Pvt. Ltd., New Delhi*** May 2025 – Jun. 2025
- Analyzed and cleaned chemical composition datasets using Python, Pandas, and NumPy to identify patterns and generate actionable insights.
- Developed Power BI dashboards to visualize analytical findings and support data-driven discussions with stakeholders.

Projects

Nexpilot AI | **AI Autonomous Workspace** June 2026
- Built a full-stack AI workspace with scalable REST APIs and AI workflow automation, supporting agentic and multi-agent workflows. *Tech: Next.js, React.js, FastAPI, Python, TypeScript, SQLite*

Object Detection & Safety System | ***Real-Time Object Detection*** March 2026
- Developed a real-time object detection system using YOLOv8 and OpenCV for live video analysis, evaluating performance using precision and recall. *Tech: Python, OpenCV, YOLOv8, NumPy*

Evidentia | ***Evidence Tampering Detection System*** November 2025
- Developed a hashing-based system to verify file integrity and detect file tampering. *Tech: HTML, CSS, JavaScript, Cryptography*

Technical & Business Skills

Analytics & Business: Python, SQL, Pandas, NumPy, Power BI, Data Analysis, Data Visualization, Predictive Modeling, Performance Analytics

Product & Strategy: Process Improvement, Stakeholder Management, Client Discovery, Feature Ownership, Performance Metrics, Campaign Planning, Cross-functional Collaboration, Business Analysis

AI & Machine Learning: Machine Learning, Generative AI, Agentic-AI, NLP, Computer Vision, Scikit-learn, TensorFlow, LLM Prompt Engineering, AI-Workflow Automation

Programming & Tools: C, Java, JavaScript, TypeScript, FastAPI, React.js, Next.js, MySQL, SQLite, Git, GitHub, Vercel, Render

Certifications

- **Deloitte** — Data Analytics Job Simulation
- **Google** — Foundations: Data, Data, Everywhere
